請依下文回答第 11 題至第 15 題

At no other time in history have sports played such a dominant role in daily life. Thanks to the 11 of the Internet and television, adults and children alike consume sports at an astonishing rate. When we are not physically involved in sports, we play them via video games or in fantasy leagues, and we watch them on TV. The celebrity status of top athletes speaks to the importance we attach to sporting events. 12, athletic endeavors have a tremendous economic, political, and cultural influence on our society. Hosting sporting events can boost tourism and revenue for a city. Sports in society can even influence our understanding of gender roles and socio-economic issues, and they can help 13 city-, state-, and national identity. Sports' 14 effect on culture is especially evident among those who may not enjoy playing or watching sports—these people often still know the names of key players, and they may still take national pride in Olympic medals. In fact, sports in society are so vital that the United Nations has 15 them a human right: Sport and play are human rights that must be respected and enforced worldwide; sport has been increasingly recognized and used as a low-cost and high-impact tool in humanitarian development and peace-building efforts.

| 15 | (A) attached | (B) declared | (C) attributed | (D) denounced |

請依下文回答第 16 題至第 20 題

The incredible thing about television is that characters have the potential to be represented in a million different ways. Unfortunately, producers tend to stick to the same few archetypes and tropes. Nearly every show about high schoolers includes a tough jock or a rebellious bad boy. As such, it is no surprise that television follows a few patterns and stereotypes when it comes to portraying intelligence.

One of the most obvious and frankly painful depictions of intelligence is the socially awkward genius. In spite of their high IQs and brilliant minds, these characters have trouble understanding jokes and other social cues. For instance, nearly every character in “The Big Bang Theory” acts this way. Most of the show’s humor comes from the contrast between the awkwardness of the brilliant physicists like Sheldon and Leonard, and the “normal” people like Penny, the waitress who lives across the hall. Another kind of intelligent character is the one whose abilities are limited to helping the protagonist. We thus can see that in the show “Arrow,” Felicity Smoak is a computer whiz who worked as an IT girl for superhero Oliver Queen’s company before joining “Team Arrow” as a hacker. She could do anything from finding shortcuts during a car chase to sending a greedy criminal’s illegally-earned income to a charity as a twisted form of blackmail—all from the comfort of her

computer screen. However, when she wasn't busy saving the world, she was reduced to little more than Oliver Queen's love interest. The final type of smart character is the one that is constantly picked on. In a high school scenario, it's the nerdy kid who gets shoved into lockers and made fun of. The show "Glee" created an entire series based on this idea. Even after the glee club won awards and competitions, it was still met with resentment from the majority of the student body. Although the audience wanted the students in the glee club to succeed, the prevailing theme throughout the show was that the kids who were smart and hard-working were not the ones who were cool and popular.

The fact is, smart people aren't as unique as television makes them out to be. They should not be marveled at like zoo animals or be used as an easy target. Additionally, the characters who are presented in the media shouldn't have their intelligence be their defining characteristic. Although television has come a long way in normalizing intelligence, there is still more ground to be gained in creating characters that are complex and interesting—not just smart.

- 16 Which of the following patterns of organization does the author most likely use when developing this passage?
- (A) Simple listing. (B) Cause and effect.
(C) Comparison and contrast. (D) Generalization and example.
- 17 Which of the following may be the best title for this passage?
